

# T-2700

## RAPID AIR FILTRATION

- State of the art air cleaning technology
- Provides multiple layers of protection
- Versatile, Mobile, and Modular

## Benefits:

- Tested more than 99% effective in inactivating many viruses and bacteria
- Ionizer tested effective against SARS - COV2 (the virus that causes COVID-19)
- Makes small particles clump together for capture by air filters
- Helps reduce allergens/particulate matter
- Ionizer is maintenance free

The T-2700 is a versatile and effective portable air scrubbing unit utilizing cutting edge air scrubbers to inactivate a wide range of pathogens, including Covid-19. Scrubbing the air makes the air safer for the occupants within a space. In addition to pathogen mitigation, there are numerous benefits to utilizing the T-2700, including technology, odor elimination and constant airflow.

The T-2700 is also a cost effective solution to treating small to large rooms. The variable speed motor allows the airflow to be dialed to specific needs to any size area, whether it be a small room or large auditorium allowing for maximum air turn.

## Specifications:

- Fully variable energy efficient permanent magnet AC motor
- Maximum airflow - 2700 CFM\*
- 120V/60Hz with 220V/50Hz available for international locations
- Two, MERV 13 air filters
- Integrated, non-ozone producing, ionization units.
- Maintenance free
- Quiet ramp up in speed
- Casters with lock for easy portability
- Unit dimensions 32" (w) x 20" (h) x 20" (l)
- Made in USA - Kansas City, MO

\*Airflow CFM rate depends on filter configuration

# RAPID AIR FILTRATION

Mobile Air Filtration with Ionization to scrub air, inactivate COVID-19 plus other viruses, and bacteria

## 1. AIR SCRUBBING

Independent testing by affiliate labs confirms inactivation rates as high as 99% for many pathogens and mold spores.

## 2. PARTICAL REDUCTION

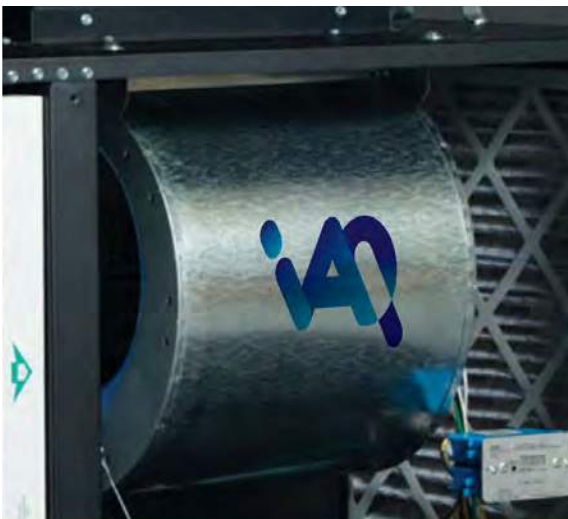

Ionization inactivates and clumps together harmful particulates for effective filtration.

## 3. ODOR CONTROL/OZONE FRIENDLY

Odors and the like are oxidized to gases already prevalent in the air, thus eliminating the odors while being Ozone friendly.

## 4. VERSATILE, MOBILE, AND MODULAR

The T-2700 can be configured in multiple ways, used in various room sizes and is easily moved as needed.

# IAQ T-2700

Ions Dispersed

Easily replaced filters and adjustable filter slot sizes

Commercial ionizer supplies ions

Intake air is pulled in on both sides. 648 total square inches of filtered intake area (18"x18" on each side)

## PATHOGEN/INACTIVATION RATE

PATHOGEN	TIME EXPOSED	INACTIVATION RATE
E. Coli	15 minutes	99.68%
Noro Virus	30 minutes	93.50%
MRSA	30 minutes	96.24%
COVID-19	30 minutes	99.40%
